

We've blazed our share of trails

Being a pioneer in the legal community means always moving forward...having the courage to climb the mountains necessary to beat the competition in a tough courtroom battle.

In 1978 we pioneered the field of multiple home landslide litigation in San Diego County.

In 1989 we broke new ground for homeowners in insurance litigation by finding coverage where no one thought to go.

In 1992 we introduced the use of high-technology laser disks and bar-coded evidence in jury trials.

In the past 19 years we've blazed a lot of trails throughout Southern California. Our ability to take on a complex case and find the right path to win is why today we remain a leader in the field of construction defect litigation.
